REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are drawn to a method of designing a probe by determining whether a probe that is similar to a desired target sequence in a set of sequences such as a genome is unique to that set of sequences, and then determining if the probe is similar to any sequence in a second set of sequences, such as a second genome. The method allows for identification of probes that are unique to a desired genome so that the presence of a target genome can be detected in the presence of a second genome. In some embodiments the claims are drawn to a computer or computer program that executes the method. Rouillard et al. shows a method of designing a probe and a computer program that executes the method termed "OligoArray." OligoArray tests a candidate probe for specificity within a single genome by searching a database of the genome sequence against the candidate probe sequence. Rouillard et al. does not show comparison to a second genome, nor does Rouillard et al. contemplate using a probe to test a sample or samples comprising sequences of multiple different genomes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
